

There's a new way to save with solar

Go solar without paying for the system

With Origin, there's a new way for solar energy to be delivered to your home. We've called it Solar Flex and it's here to make solar easier and more accessible. For starters, you won't have to pay to have the system installed, we'll cover that. Plus, as we own the solar system, we'll take care of any ongoing maintenance costs.

Why choose Solar Flex?

You'll pay \$0
for the solar system*

You'll lock in
a low solar energy rate^

You won't have
the hassle of managing
the ongoing maintenance and
monitoring of the system

How it works

- Step 1** We'll have one of our Solar Specialists look at your premise – they'll make sure it's the right solution for your energy usage and check that it can be installed.
- Step 2** You can choose from a selection of contract periods to suit you – from as short as 5 years up to 15 years.
- Step 3** If you decide to go ahead, you'll enter into an Origin Solar Flex agreement and we'll lock in a low solar contract rate^.
- Step 4** Once all that's sorted, we'll have the solar system installed at a time that suits.
- Step 5** From then on, you'll start paying for the solar power you generate at the low energy rate.

*Some site based non-system costs may be incurred and will be quoted at the time of sale.

^Solar energy rate is subject to change in law and may have an escalation charge.

Is it right for me?

Our Solar Specialists will look over things to make sure Solar Flex is right for you. But, here are some things you should consider first:

- Solar Flex works best for businesses that use a lot of their electricity during the day (when the sun's out). So it's great if your hours of operation occur during daytime periods
- The solar energy generated from the system isn't stored for later – so you need to make the most of it
- Solar Flex involves a long-term commitment – it's a good idea to look at your circumstances and think about how likely they are to change. Do you anticipate that your consumption patterns and usage will be the same in the future? Are you planning on moving premises in the next few years?

What if my circumstances change?

We understand that things can change and we've allowed for that in our Solar Flex agreement. You can:

- End your agreement by paying an exit fee
- Offer to buy the system from us (you'll find an indicative price in your initial contract)

If you sell your premise, the new owner will be given the choice to continue using the solar system the same way you did. If interested, they'll just need to meet our credit requirements and enter into an agreement with us – then they can take up the balance of the contract where you left off and get the same low solar rate.

What happens at the end of my contract?

1. Solar systems last a long time, so if you're happy with the way things are going, we don't need to change anything. You'll just continue paying for the energy generated by the solar system at a new rate.
2. If you're ready to make it yours, you might like to offer to buy the system from us.
3. Or if you prefer to pay for it to be removed, that's ok too – we can sort that out.

Are you ready to start enjoying the benefits of going solar without paying for the system?
